

Which of the following statements about Band ① is accurate?

- A) It is often used in passive remote sensing.
 B) It is suitable for thermal remote sensing.
 C) It operates only during the day and is affected by weather conditions.
 D) It can penetrate vegetation to detect subsurface targets.

Stage 1: Planning

Coordinator

Task Specification
 Meta Information Analysis
 Fine-grained Task Decomposition

Required Agents: [Retrieval , Reasoning]

You are an **Intelligent Orchestration Expert** in the field of Remote Sensing that analyzes images and queries, creating execution plans through the coordination of multiple specialized agents...

Detection Segmentation
 Classification ...

Reasoning Toolkit

Spatial-Temporal Analysis
 Multiple Choice Matching ...

Stage 2: Multi-Agent Execution

Coordinator

Retrieval Agent

Perception Agent

Reasoning Agent

More Agent

You are an **Intelligent Analysis Expert** in the field of Remote Sensing that understands images and queries, determining the best approach to solve complex tasks by coordinating multiple specialized agents...

Stage 3: Self Evaluation

Coordinator

Input: Agent Execution Results

Evaluation Dimensions

Logic: Reasonable? ✓ Domain Validity? ✓
 Spatial Reasoning? ✓ Accuracy: Reliable? ✓

Grade:

Excellent → output Fair → re-execution

Result: D

Re-execution with previous logs. (up to two times)

You are a **Professional Assessment Expert** in the field of Remote Sensing, specialized in evaluating the correctness of image analysis results. You assess logic, consistency, completeness ...
